II) Social media pixels and plugins

1. Meta Pixel (formerly Facebook Pixel)

This website uses the visitor action pixel from Meta to measure conversions. The provider of this service is Meta Platforms Ireland Limited, 4 Grand Canal Square, Dublin 2, Ireland. However, according to Meta, the data collected is also transferred to the USA and other third countries.

This allows the behavior of site visitors to be tracked after they have been redirected to the provider's website by clicking on a meta ad. This allows the effectiveness of the meta ads to be evaluated for statistical and market research purposes and future advertising measures to be optimized.

The data collected is anonymous to us as the operator of this website; we cannot draw any conclusions about the identity of the user. However, the data is stored and processed by Meta so

that a connection to the respective user profile on Facebook or Instagram is possible and Meta can use the data for its own advertising purposes in accordance with the Meta Data Usage Policy (<https://de-de.facebook.com/about/privacy/>). This enables Meta to place advertisements on Facebook or Instagram pages and other advertising channels. This use of the data cannot be influenced by us as the website operator.

The use of this service is based on your consent in accordance with Art. 6 para. 1 lit. a GDPR and § 25 para. 1 TDDDG. Consent can be revoked at any time.

We use the advanced matching function within the meta pixels.

Advanced matching enables us to transmit various types of data (e.g. place of residence, state, zip code, hashed email addresses, name, gender, date of birth or telephone number) of our customers and prospects that we collect via our website to Meta. This allows us to tailor our advertising campaigns on Facebook and Instagram even more precisely to people who are interested in our offers. In addition, the extended comparison improves the allocation of website conversions and expands custom audiences

Insofar as personal data is collected on our website with the help of the tool described here and forwarded to Meta, we and Meta Platforms Ireland Limited, 4 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland are jointly responsible for this data processing (Art. 26 GDPR). The joint responsibility is limited exclusively to the collection of the data and its transfer to Meta. The processing carried out by Meta after forwarding is not part of the joint responsibility. The obligations incumbent on us jointly have been set out in a joint processing agreement. The text of the agreement can be found at: https://www.facebook.com/legal/controller_addendum. According to this agreement, we are responsible for providing the data protection information when using the Meta tool and for the secure implementation of the tool on our website in accordance with data protection law. Meta is responsible for the data security of the Meta products. You can assert data subject rights (e.g. requests for information) regarding the data processed by Facebook or Instagram directly with Meta. If you assert your data subject rights with us, we are obliged to forward them to Meta.

With the help of Mailchimp, we can analyze our newsletter campaigns. When you open an email sent with Mailchimp, a file contained in the email (known as a web beacon) connects to Mailchimp's servers in the USA. This makes it possible to determine whether a newsletter message has been opened and which links, if any, have been clicked on. Technical information is also collected (e.g. time of access, IP address, browser type and operating system). This information cannot be assigned to the respective newsletter recipient. It is used exclusively for the statistical analysis of newsletter campaigns. The results of these analyses can be used to better adapt future newsletters to the interests of the recipients.

The data you provide us with for the purpose of subscribing to the newsletter will be stored by us or the newsletter service provider until you unsubscribe from the newsletter and deleted from the newsletter distribution list after you unsubscribe from the newsletter. Data stored by us for other purposes remains unaffected by this.

Data transfer to the USA is based on the standard contractual clauses of the EU Commission. You can find details here:

<https://mailchimp.com/eu-us-data-transfer-statement/> and https://mailchimp.com/legal/data-processing-addendum/#Annex_C_-_Standard_Contractual_Clauses.

After you unsubscribe from the newsletter distribution list, your e-mail address may be stored by us or the newsletter service provider in a blacklist if this is necessary to prevent future mailings. The data from the blacklist will only be used for this purpose and will not be merged with other data. This serves both your interest and our interest in complying with the legal requirements when sending newsletters (legitimate interest within the meaning of Art. 6 para. 1 lit. f GDPR). Storage in the blacklist is not limited in time. **You can object to the storage if your interests outweigh our legitimate interest.**

III) Special features of roadsurfer Abo and roadsurfer Rent

1. Ident procedure for the rental of vehicles

Purpose of data processing

The rental of vehicles as part of a camper subscription at <https://roadsurfer.com/de-de/camper-abo/> and via roadsurfer Rent at <https://roadsurfer.com/de/> requires the validation and legitimization of your person by means of an identification procedure. For this purpose, you send us a copy of your driver's license and an identification document (ID card or passport) via a secure connection. To identify identity fraud, these images are stored by us after validation for a maximum of 30 days after termination of the rental contract for a vehicle and then deleted in accordance with data protection regulations. The information that you have a driving license is stored for a maximum of 2 years and checked regularly so that we can comply with our legal obligations.

to comply with our documentation obligation that you have a valid driver's license. We store your identity card or passport number in order to protect ourselves against property crimes or to recover our property in the event of misappropriation and to comply with vehicle insurance contract requirements for claims settlement.

The aforementioned data processing operations serve the purpose of contract preparation and contract execution.

The obligation to check whether you have a driver's license is imposed on us by law. The legal basis for the processing mentioned can be found in Art. 6 para. 1 lit. b (fulfillment of contract), Art. 6 para. 1 lit. c (legal obligation) and Art. 6 para. 1 lit. f GDPR (legitimate interest).

Furthermore, we ask you as the person concerned to take note that you are fully responsible for all violations of traffic and regulatory regulations and other provisions and that roadsurfer may be obliged to name the person concerned to the competent authority so that it can issue a warning fine. If you are accused of having committed a misdemeanor or criminal offense with one of our vehicles, we process your data stored with us (surname, first name, address, date of birth and all other contract data) in accordance with our legal obligations and at the request of the competent authority, as well as the data transmitted by the competent authority in the respective country. Our legitimate interest lies in averting sanctions against our company.

Involvement of third parties for data processing: IDnow GmbH

Video identification and driver's license verification are also carried out by the service provider IDnow GmbH, Auenstraße 100, 80469 Munich. For this purpose, we transmit the user's personal data (first name and surname) to IDnow. IDnow assigns a process number to this data, which is communicated to you and which you can use to start the video identification process.

Identification is carried out by accessing the smartphone camera and capturing the machine-readable part of the ID document/driver's license as well as non-machine-readable parts, such as the address field. In the next step, other security features of the ID documents, such as holograms, are checked. The identification process is then completed with a brief "liveness detection" via the camera.

As part of the video identification process, a secure video connection is established between IDnow and your end device, as direct visual contact is required to confirm your identity. As part of the video identification process, either IDnow's systems automatically check your identity and/or an IDnow employee checks your identity using the ID document.

The IDnow employee must take and store screenshots or photos of you and the complete front and back of your ID card or the front of your passport to prove that the video identity confirmation has been carried out correctly. In addition, IDnow will also record and store the conversation between

you and the IDnow employee in parallel with the video transmission. The video image transmission will not be recorded. At the beginning of the video identification, the IDnow employee will ask you for your express consent to take screenshots or photos and to record the conversation. The data will be transmitted to us by IDnow and deleted from the IDnow servers after 3 days at the latest. If you do not wish to have screenshots or recordings made, you also have the option of having our support team identify you by calling you back.

IDnow must ensure the authenticity of the ID card or passport presented by you. For this purpose, the IDnow employee must visually check the integrity and presence of the optical security features of the respective ID document in accordance with the regulations. To do this, please follow the instructions of the IDnow employee to place the ID card or passport in certain positions in front of the camera. The IDnow employee will also ask you to read out the full serial number of your ID document.

The applicable data protection provisions can be found at <https://www.idnow.io/de/regularien/datensicherheit/>.

The legal basis for the processing mentioned can be found in Art. 6 para. 1 lit. c (legal obligation) and Art. 6 para. 1 lit. f GDPR (legitimate interest).

For more information on the right to object in this context with our legitimate interest, see [Section IV.](#)

2. Data processing when renting a vehicle

We process the following data when a rental contract is concluded via roadsurfer Rent or roadsurfer Abo:

- Customer data: Salutation, first name, cash on delivery, address. Contact details (e-mail, telephone number), age, data in connection with your driver's license (date of issue) ("rental customer data");
- Vehicle location data: Location information about the vehicle ("location data");
- Technical vehicle data: data collected by means of a vehicle data system, in particular with regard to opening or locking the vehicle via a remote control, collision information, information on vehicle operation (e.g. oil level, tire pressure and fuel level as well as other diagnostic and performance data), if applicable, recording of minor damage to the vehicle ("technical vehicle data").

For the purpose of verifying identity and preventing misuse, fraud, or unauthorized claims, the landlord is entitled to make a copy of the tenant's ID card (front and back) and to store it temporarily.

The processing is based on the legitimate interest pursuant to Art. 6(1)(f) GDPR in ensuring the secure and proper execution of the rental agreement as well as in protecting the landlord's property against misuse or damage. The copy will be marked with a watermark as "Copy," used solely for the purposes stated above, and automatically deleted at the latest upon return of the vehicle.

The rented vehicles may contain a so-called vehicle data system that records the aforementioned location data as well as technical vehicle data and thus the vehicle condition and performance (so-called telematics).

Furthermore, vehicles in the European Union must be equipped with eCall technology. This is activated if you are involved in an accident. With the help of eCall, emergency services are automatically called and information about the accident is passed on. Telematics data is shared with emergency services and other parties who provide assistance in the event of an accident, as well as

with telematics service providers or parties to whom we are legally or contractually obliged to provide this data.

Please note that we are not responsible for any data that remains in the vehicle as a result of your use. We cannot guarantee the privacy or confidentiality of such information and therefore ask you to delete the data before returning the vehicle.

3. Purpose and legal basis for processing rental customer data

We process the rental customer data in order to process the rental agreement between you and us, to manage the contractual relationship and to comply with our legal obligations in this context.

The legal basis for the aforementioned data processing is Art. 6 para. 1 lit. b GDPR (fulfillment of the rental agreement) and Art. 6 para. 1 lit. c GDPR (fulfillment of legal requirements).

4. Purpose and legal basis for processing vehicle data

We process the location data and the technical vehicle data as follows:

- Collecting data on the condition and performance of the vehicle during the rental (including vehicle damage, mileage, fuel consumption and other operational data) to improve the accuracy of our billing processes when the vehicle is returned.

The legal basis for this is our legitimate interest (Art. 6 para. 1 lit. f GDPR) in correctly accounting for the use of the vehicle, including fuel consumption and damage, during the rental period.

- Collecting data relating to the driver's operation of the vehicle during the rental for safety and claims management purposes, including contacting the renter of the vehicle if the data indicates that there is a safety or operational issue that we need to bring to your attention.

The legal basis for this is our legitimate interest (Art. 6 para. 1 lit. f GDPR) to defend and manage claims in the event of accidents involving the shared vehicle; to ensure that we comply with our safety obligations in relation to the vehicle and any rental.

- The collection of location data during the rental period if the driver breaches the rental agreement (if he fails to return the vehicle on time or if he drives into unauthorized areas) or to defend and manage claims in the event of accidents involving the rental vehicle.

The legal basis for this is our legitimate interest (Art. 6 para. 1 lit. f GDPR) in protecting our assets, enforcing our terms and conditions and defending and managing claims.

- The location data is also processed in anonymized and aggregated form in order to improve roadsurfer's service in the areas of spots, rental stations and service. Anonymous location data does not allow us to draw any conclusions about your identity, but only to determine the location of the vehicle itself.

The legal basis for this is our legitimate interest (Art. 6 para. 1 lit. f GDPR) in improving the service and offering for our customers.

The aforementioned processing does not serve the purpose of creating a user profile. All data will be deleted after the rental agreement has been executed, unless they still need to be processed for the assertion of legal claims.

For more information on the right to object in connection with our legitimate interest, see [Section IV](#).

If you have given your prior consent in accordance with Art. 6 para. 1 lit. a GDPR or § 25 para. 1 TDDDG, we process the location data in order to guide you to the nearest garage or to help with other location-related problems (e.g. organization of a towing service).

5. Processing your location data for product improvement and sending local offers

Product improvement and sending of local offers means the processing of the GPS data of the rented vehicle in connection with your personal customer data set in order to better tailor our offer to your personal needs and based on your location and to increase the relevance of our promotions for you and to send personalized content and offers in your area. We use e-mail addresses to transmit this content.

This processing takes place exclusively on the basis of your consent in accordance with Art. 6 para. 1 lit. a GDPR. You can withdraw your consent at any time.

We only use this data if we have received your express consent to do so. You can revoke your consent at any time with effect for the future, e.g. by e-mail or after booking a vehicle in the customer area provided by deactivating the corresponding checkbox.

6. Credit check roadsurfer subscription

If you book a camper subscription with us via roadsurfer Abo, we carry out a credit check with Schufa Holding AG in advance in order to reduce the risk of payment defaults. Whether we can grant you the subscription is decided by our employees on the basis of a forecast based on the value transmitted by Schufa Holding AG.

The legal basis for this is Art. 6 para. 1 lit. b (fulfillment of contract) and Art. 6 para. 1 lit. f GDPR (legitimate interest). Our legitimate interest is to be able to assess all payments that entail a credit risk as well as possible before granting a subscription and to verify whether you can meet your payment obligations. For further information on the right of objection in this context, see [Section IV](#). Please note, however, that we will not be able to offer you a camper subscription in this case.

7. Transmission of data to third parties

With the exception of Schufa Holding AG, we do not transfer data to third parties. However, we may be required to disclose this data in individual cases due to requests from government agencies or private service providers (e.g. parking lot operators, tolls).
